

LABORATORIO Nro 8

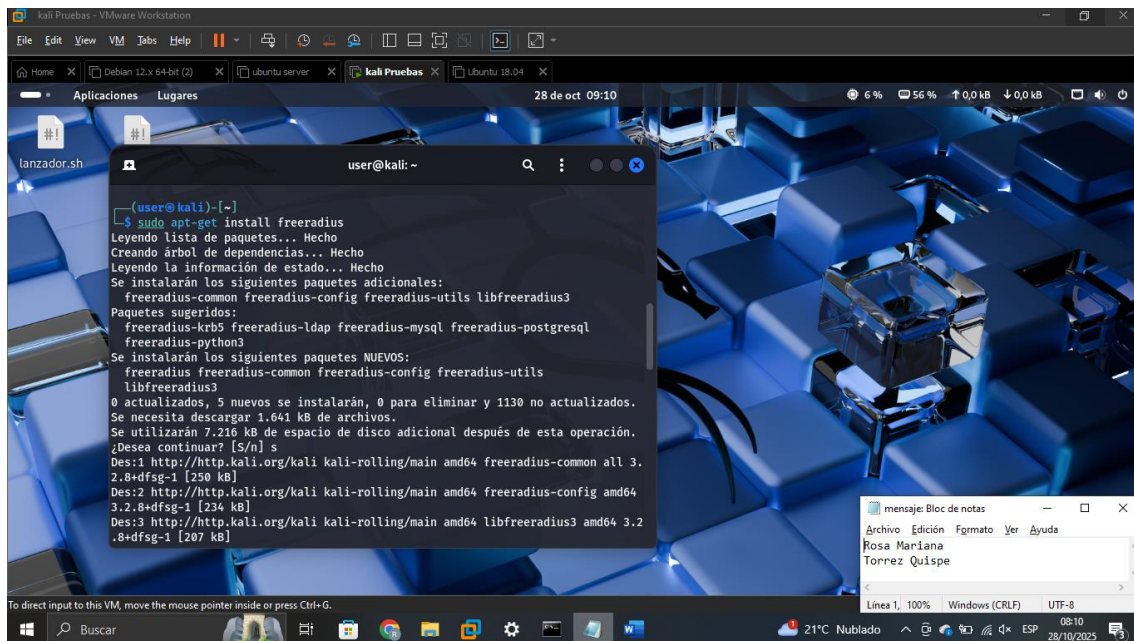

Univ. Rosa Mariana Torrez Quispe

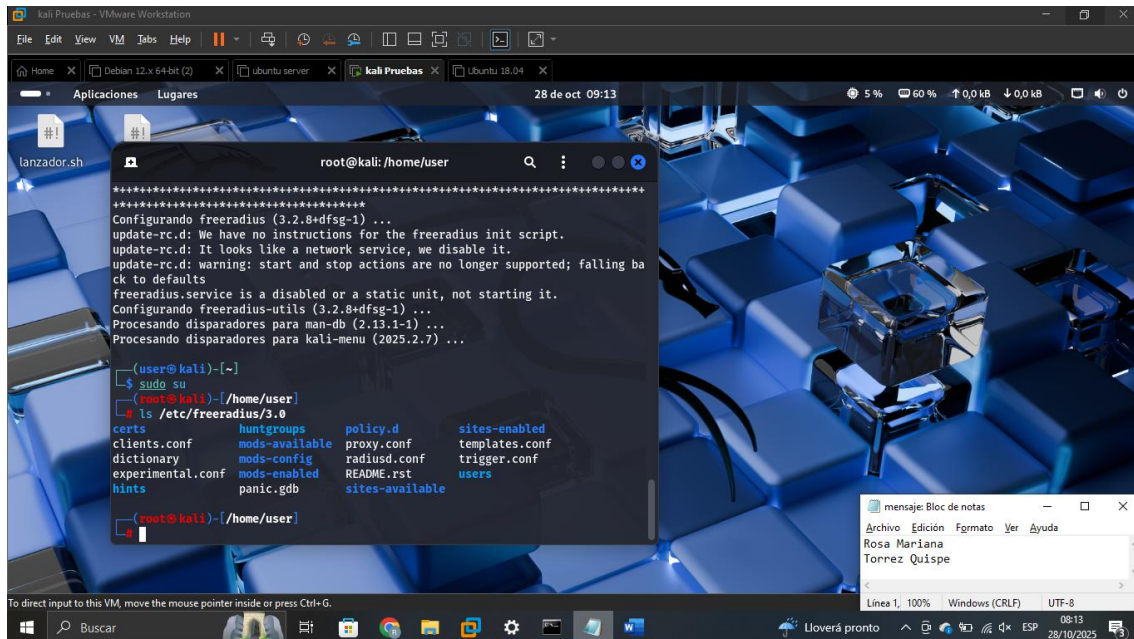

Instalación de Freeradius

Hecho esto procedemos con la instalación de Freeradius con el siguiente comando:

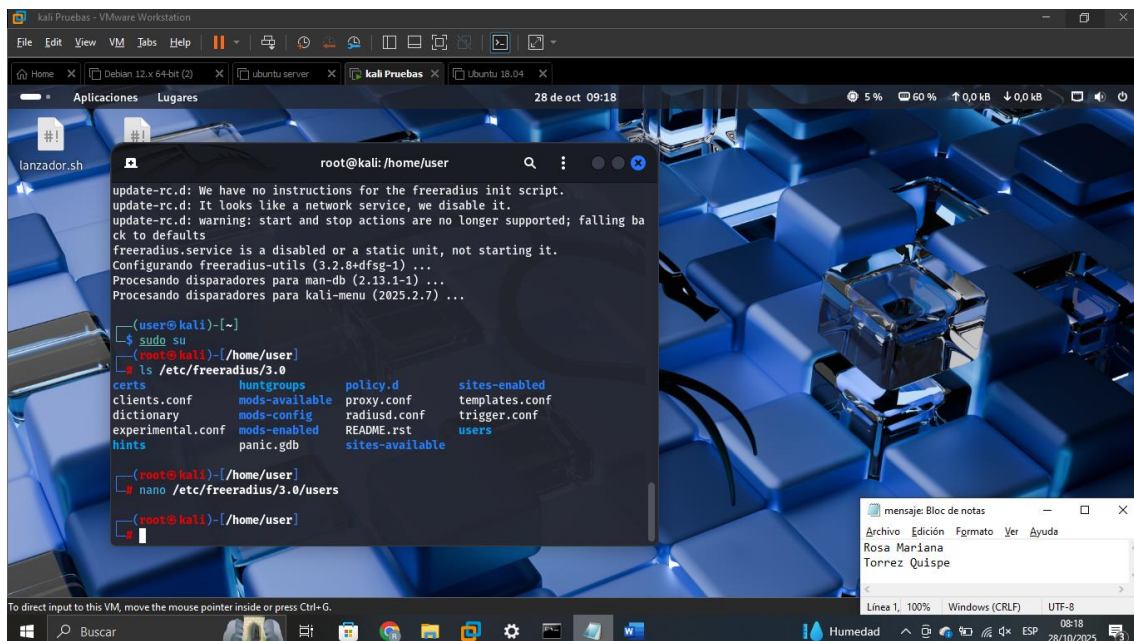

`sudo apt-get install freeradius`

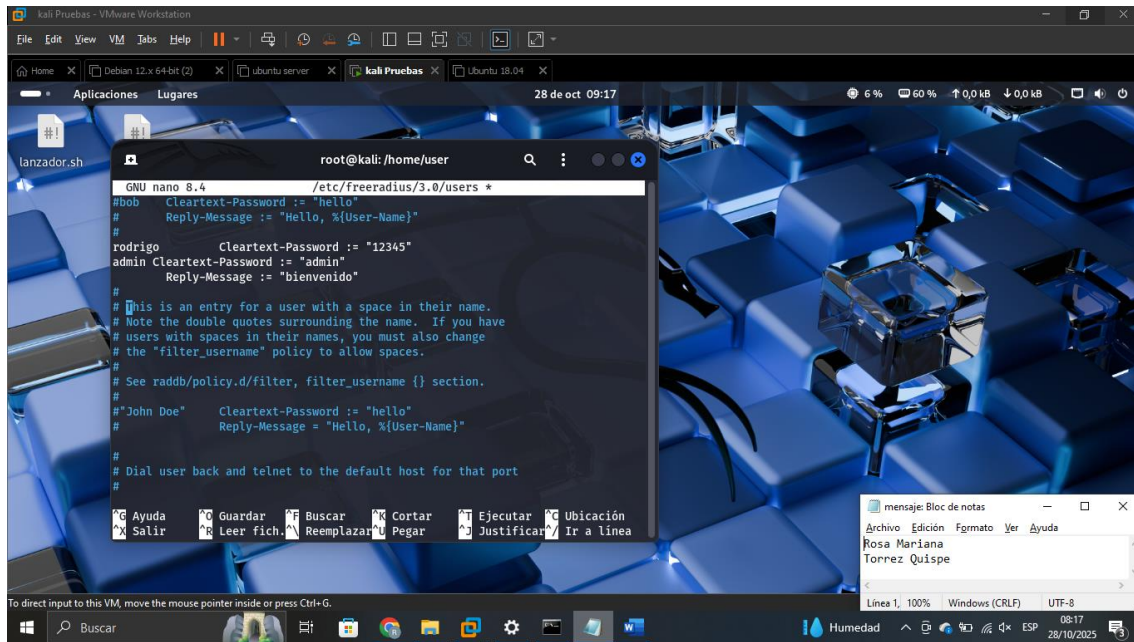

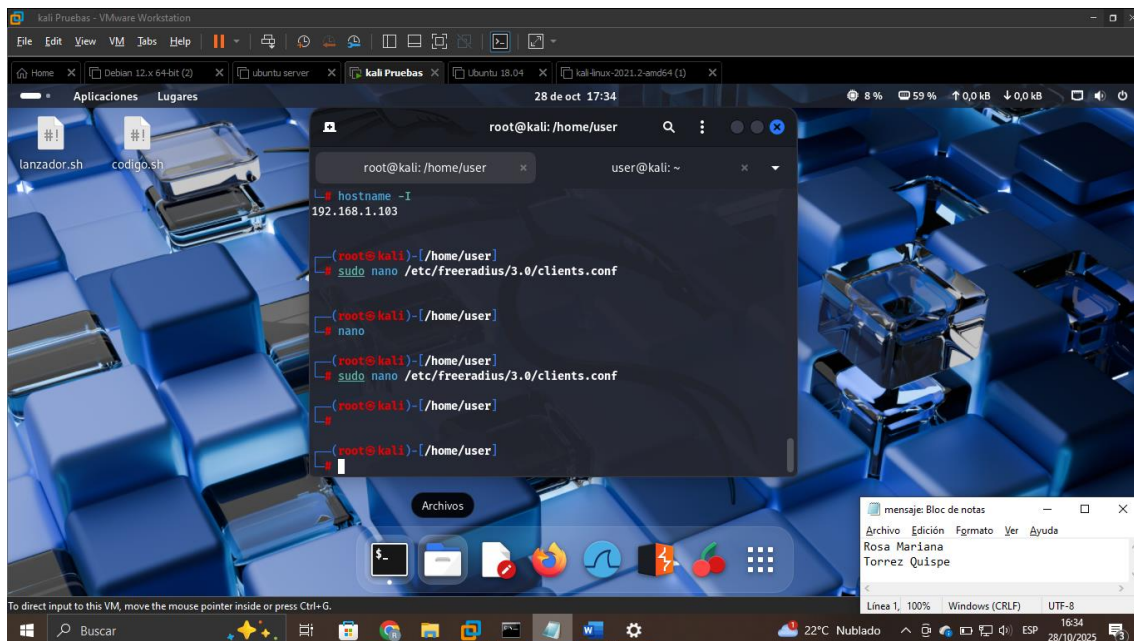

Nos dirigimos a la carpeta de Freeradius con el comando: `ls /etc/freeradius/3.0/`

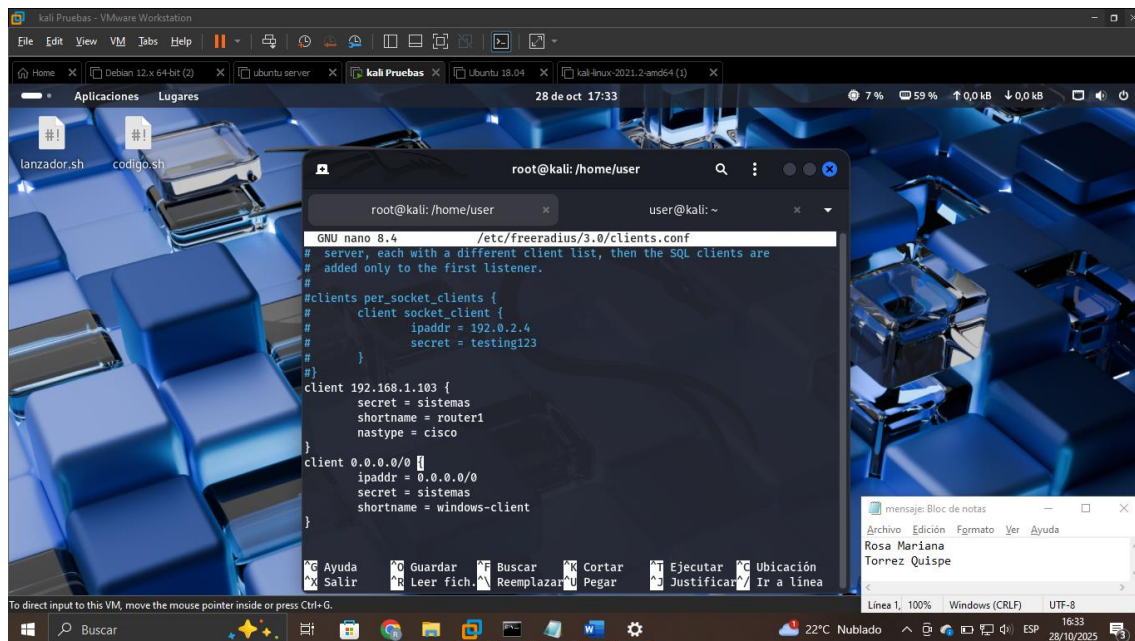

Luego para comenzar con la configuración, accedemos al archivo de usuarios utilizando el comando `nano /etc/freeradius/3.0/users`

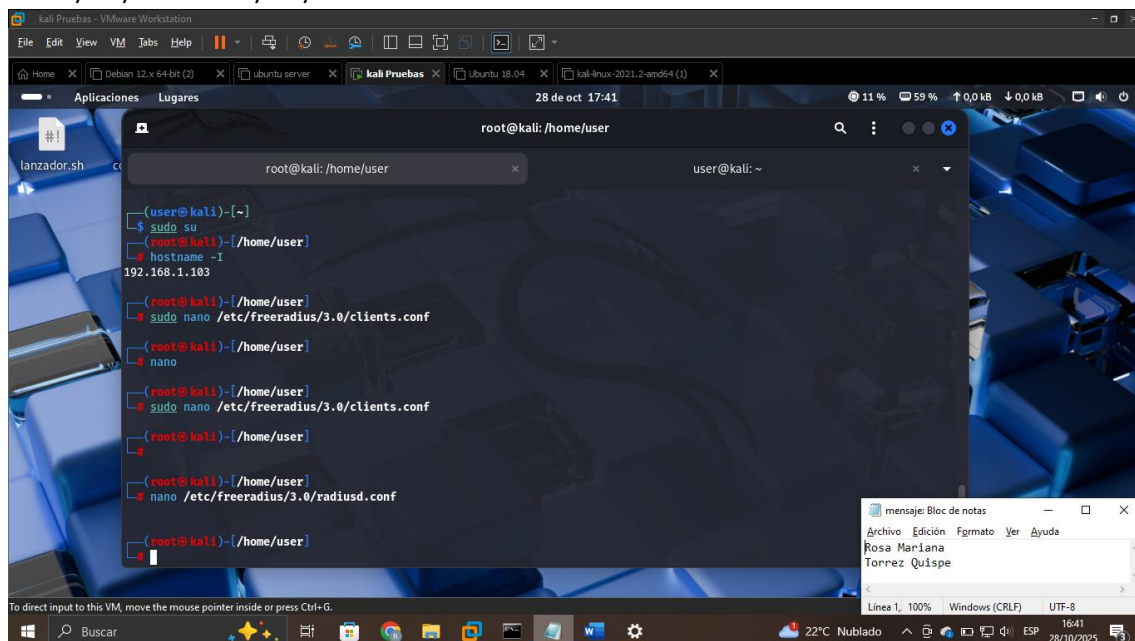

ingresamos el comando: nano /etc/freeradius/3.0/clients.conf

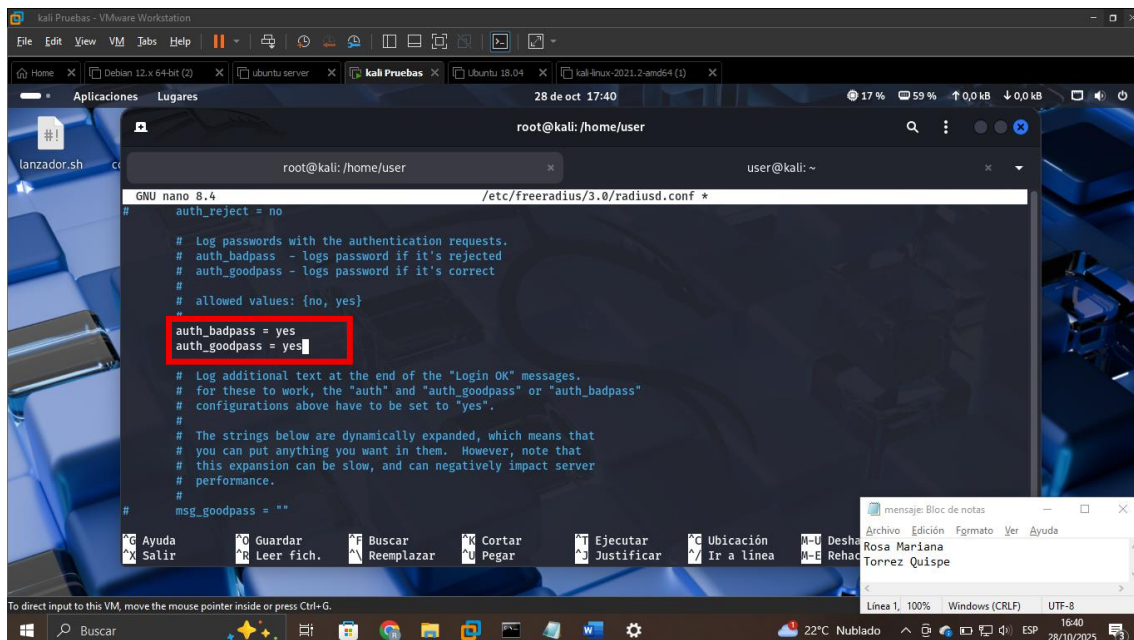

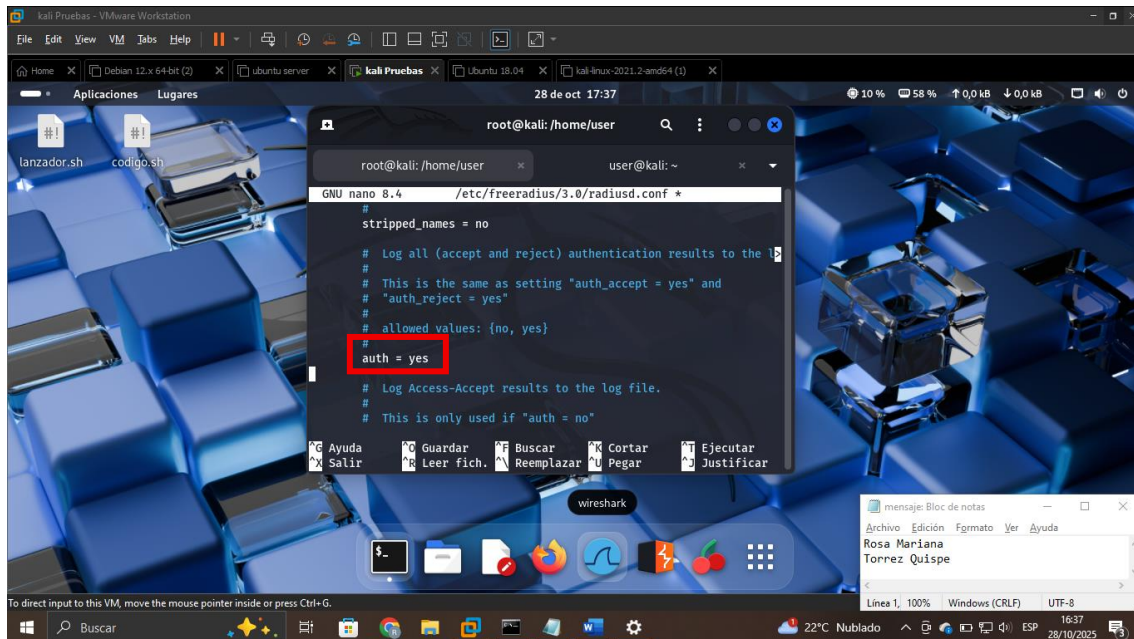

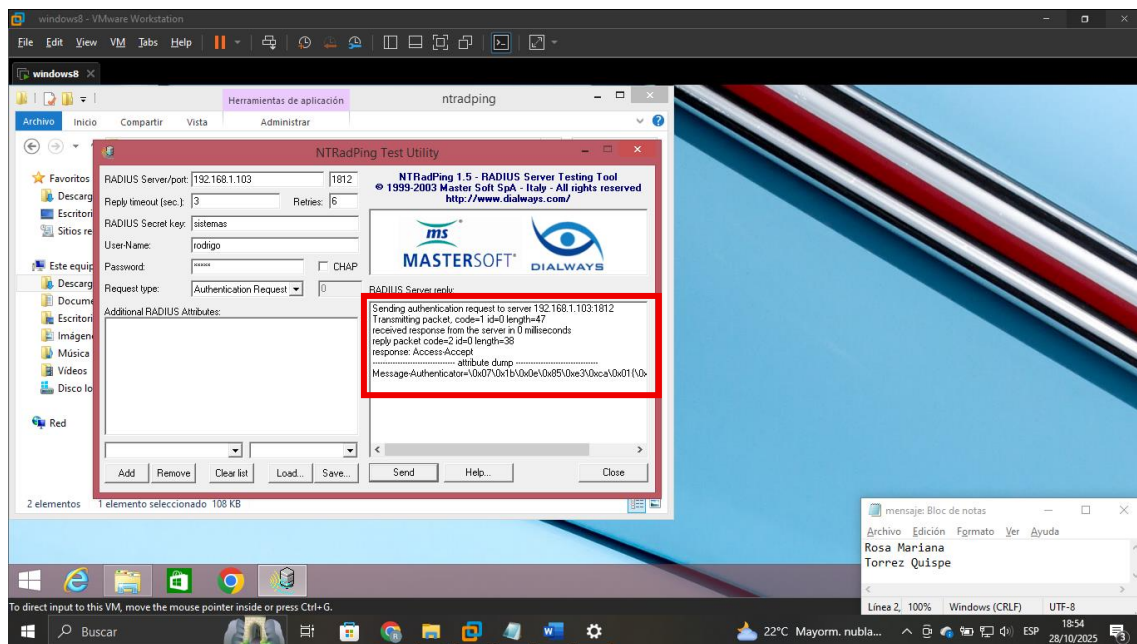

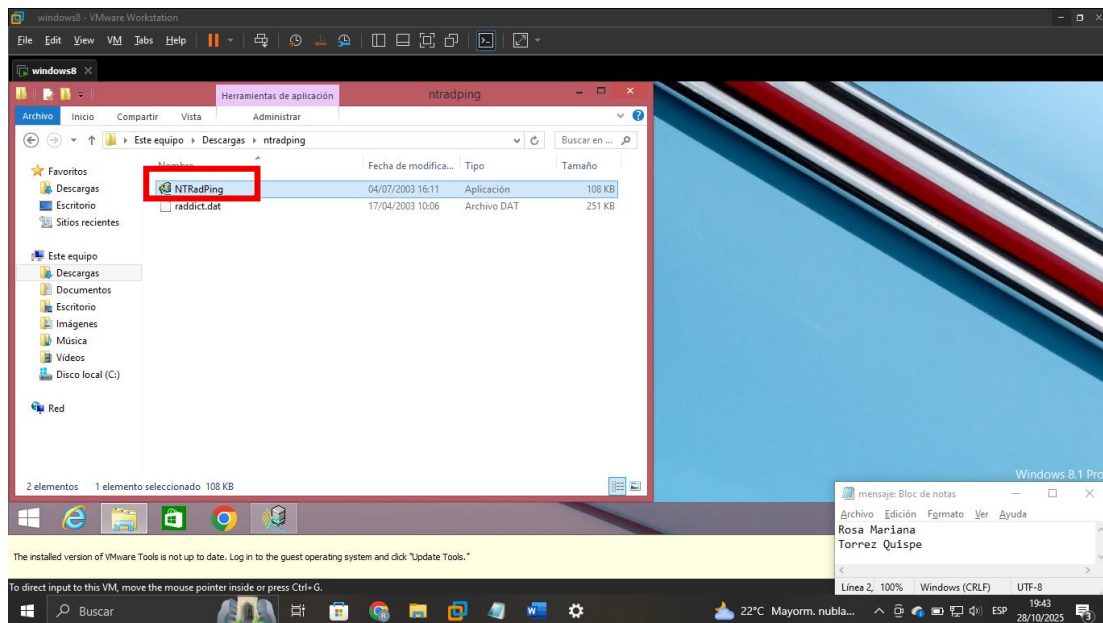

nos dirigimos al archivo radiusd.conf con el comando:

`nano /etc/freeradius/3.0/radiusd.conf`

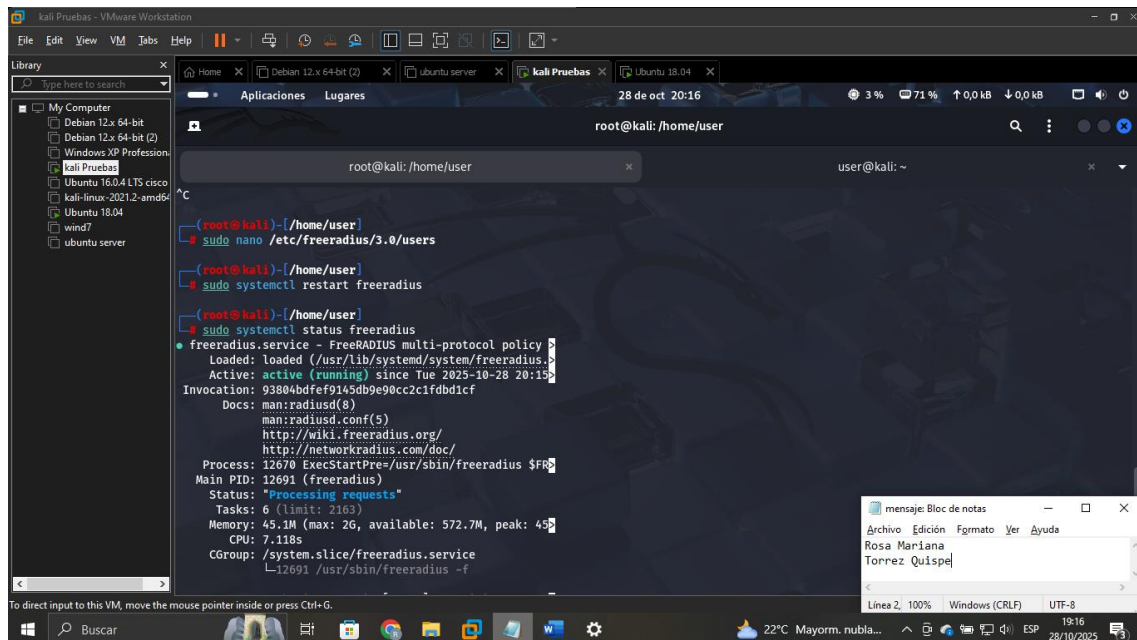

Procedemos a reiniciar el servicio de Freeradius para aplicar todos los cambios realizados con el siguiente comando: `sudo systemctl restart freeradius`

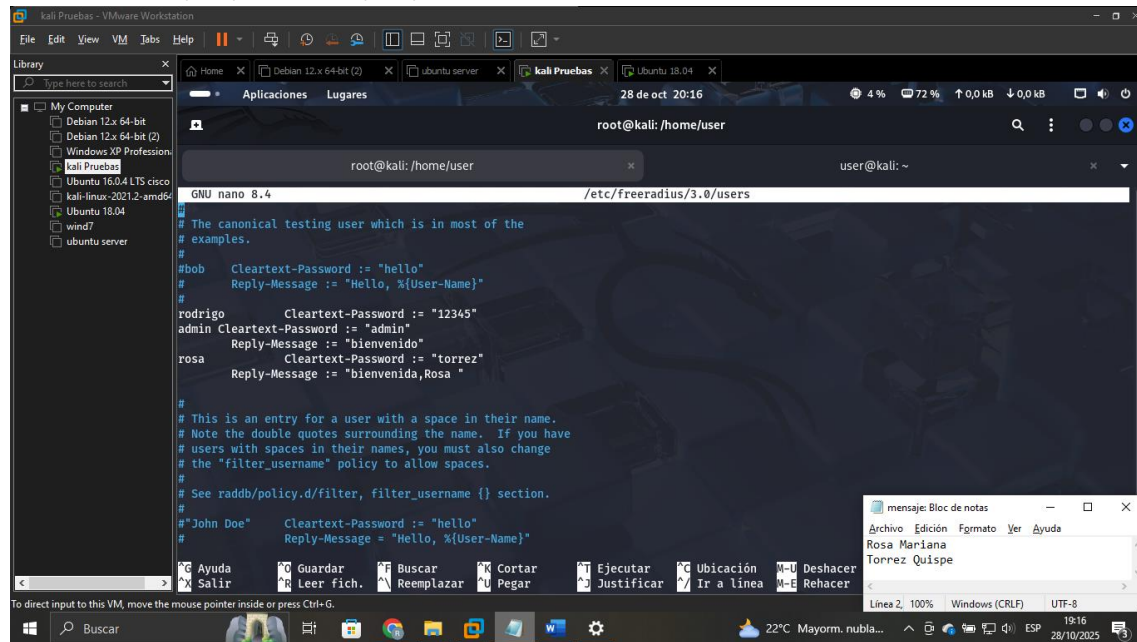

1.- Con que comando se puede ver los logs en tiempo real en el servidor radius.

```
sudo tail -f /var/log/freeradius/radius.log
```

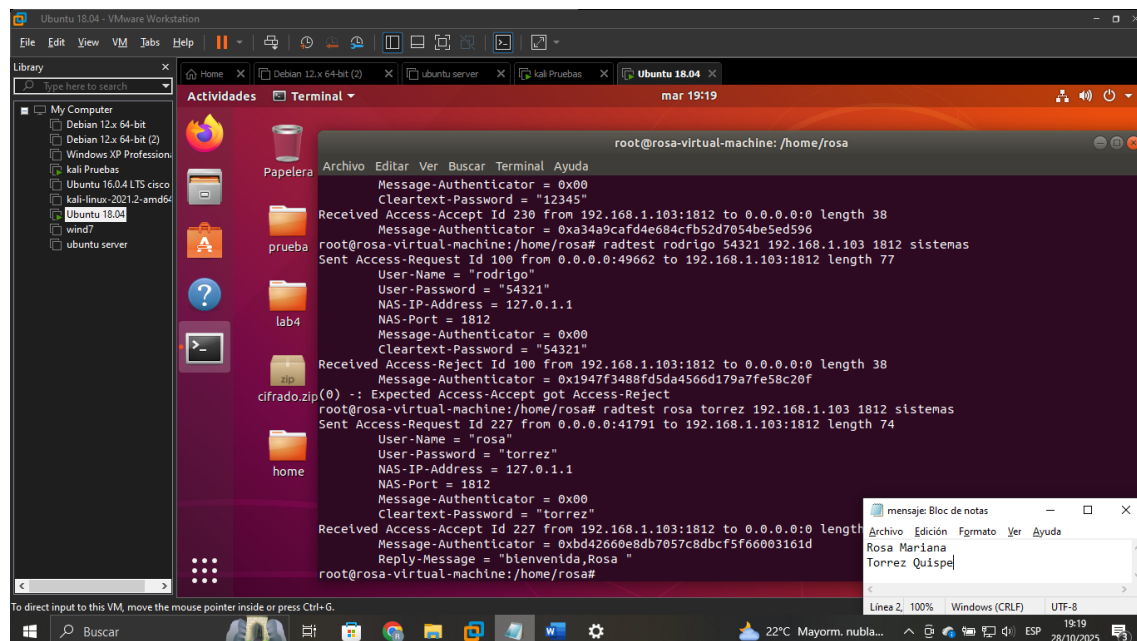

En sudo nano /etc/freeradius/3.0/users

The screenshot shows a Kali Linux virtual machine in VMware Workstation. The terminal window is open, displaying the contents of the file `/etc/freeradius/3.0/users` using the nano text editor. The file contains configuration for several users, including a canonical testing user and three examples: bob, rodrigo, and admin. The configuration for 'rodrigo' is highlighted. A 'mensaje: Bloc de notas' (Note: Notepad) window is open in the foreground, showing the text 'Rosa Mariana Torrez Quispe'. The terminal prompt is `root@kali: /home/user`. The VMware interface shows the 'kali Pruebas' VM with 2GB of RAM and 16GB of disk space.

```
GNU nano 8.4 /etc/freeradius/3.0/users
#
# The canonical testing user which is in most of the
# examples.
#
#bob   Cleartext-Password := "hello"
#       Reply-Message := "Hello, %{User-Name}"
#
#rodrigo   Cleartext-Password := "12345"
#admin   Cleartext-Password := "admin"
#       Reply-Message := "bienvenido"
#rosa    Cleartext-Password := "torrez"
#       Reply-Message := "bienvenida,Rosa "
#
# This is an entry for a user with a space in their name.
# Note the double quotes surrounding the name. If you have
# users with spaces in their names, you must also change
# the "filter_username" policy to allow spaces.
#
# See raddb/policy.d/filter, filter_username {} section.
#
#"John Doe"   Cleartext-Password := "hello"
#              Reply-Message := "Hello, %{User-Name}"
```

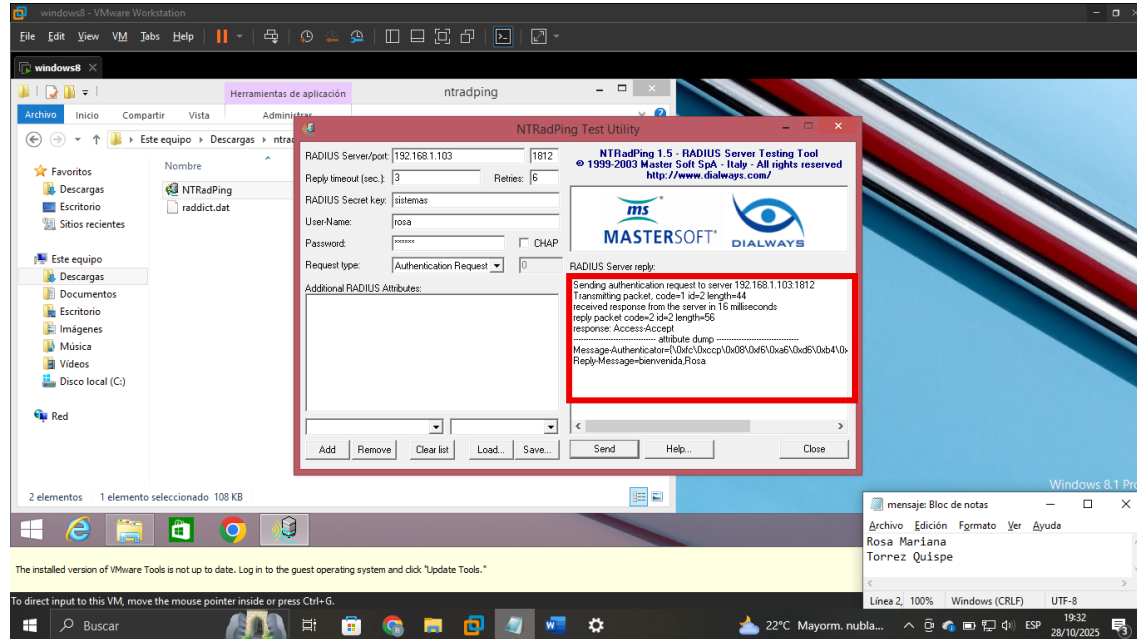

En ubuntu

The screenshot shows an Ubuntu 18.04 virtual machine in VMware Workstation. The terminal window is open, displaying RADIUS authentication logs. The logs show a successful authentication for 'rodrigo' and a failed authentication for 'rosa'. The terminal prompt is `root@rosa-virtual-machine: /home/rosa`. A 'mensaje: Bloc de notas' (Note: Notepad) window is open in the foreground, showing the text 'Rosa Mariana Torrez Quispe'. The VMware interface shows the 'Ubuntu 18.04' VM with 2GB of RAM and 16GB of disk space.
